# **NumPy Exercises**

Now that we've learned about NumPy let's test your knowledge. We'll start off with a few simple tasks, and then you'll be asked some more complicated questions.

# Name - Moksha sai

# Reg.no - 21bce9167

# **VITAP**

# mokshasai.21bce9167@vitapstudent.ac.in

## Import NumPy as np

```
In [5]: import numpy as np
```

## Create an array of 10 zeros

```
In [12]: np.zeros(10)
Out[12]: array([0., 0., 0., 0., 0., 0., 0., 0.])
```

#### Create an array of 10 ones

```
In [13]: np.ones(10)
Out[13]: array([1., 1., 1., 1., 1., 1., 1., 1.])
```

#### Create an array of 10 fives

```
In [14]: np.ones(10)*5

Out[14]: array([5., 5., 5., 5., 5., 5., 5., 5.])
```

### Create an array of the integers from 10 to 50

### Create an array of all the even integers from 10 to 50

### Create a 3x3 matrix with values ranging from 0 to 8

### Create a 3x3 identity matrix

### Use NumPy to generate a random number between 0 and 1

```
In [24]: np.random.rand()
Out[24]: 0.41141608430562737
```

# Use NumPy to generate an array of 25 random numbers sampled from a standard normal distribution

#### Create the following matrix:

## Create an array of 20 linearly spaced points between 0 and 1:

```
In [30]: np.linspace(0,1,20)
```

```
Out[30]: array([0. , 0.05263158, 0.10526316, 0.15789474, 0.21052632, 0.26315789, 0.31578947, 0.36842105, 0.42105263, 0.47368421, 0.52631579, 0.57894737, 0.63157895, 0.68421053, 0.73684211, 0.78947368, 0.84210526, 0.89473684, 0.94736842, 1. ]
```

# **Numpy Indexing and Selection**

Now you will be given a few matrices, and be asked to replicate the resulting matrix outputs:

```
In [32]: mat = np.arange(1,26).reshape(5,5)
         array([[ 1, 2, 3, 4, 5],
Out[32]:
                [6, 7, 8, 9, 10],
                [11, 12, 13, 14, 15],
                [16, 17, 18, 19, 20],
                [21, 22, 23, 24, 25]])
 In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
         # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
         # BE ABLE TO SEE THE OUTPUT ANY MORE
In [33]: mat[2:,1:]
Out[33]: array([[12, 13, 14, 15],
                [17, 18, 19, 20],
                [22, 23, 24, 25]])
 In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
         # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
         # BE ABLE TO SEE THE OUTPUT ANY MORE
In [34]:
         mat[3,4]
Out[34]:
In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
         # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
         # BE ABLE TO SEE THE OUTPUT ANY MORE
In [36]: mat[0:3,1:2]
         array([[ 2],
Out[36]:
                [7],
                [12]])
 In [0]: # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
         # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
         # BE ABLE TO SEE THE OUTPUT ANY MORE
In [37]: mat[4:,0:]
Out[37]: array([[21, 22, 23, 24, 25]])
         # WRITE CODE HERE THAT REPRODUCES THE OUTPUT OF THE CELL BELOW
         # BE CAREFUL NOT TO RUN THE CELL BELOW, OTHERWISE YOU WON'T
         # BE ABLE TO SEE THE OUTPUT ANY MORE
In [38]:
         mat[3:,0:]
```

9/6/23, 12:55 PM Numpy Exercise

```
Out[38]: array([[16, 17, 18, 19, 20], [21, 22, 23, 24, 25]])
```

# Now do the following

#### Get the sum of all the values in mat

```
In [40]: np.sum(mat)
Out[40]: 325
```

#### Get the standard deviation of the values in mat

```
In [43]: np.std(mat)
Out[43]: 7.211102550927978
```

#### Get the sum of all the columns in mat

```
In [44]: np.sum(mat,axis=0)
Out[44]: array([55, 60, 65, 70, 75])
```
